I'm Kylie Brush

Got a happy head
It goes together
With my happy heart babe
Said my happy head
Goes together with my happy heart

When I hear your name
And I feel the flame
Of our lovelight as it begins to burn
And we teach each other
A good love lesson
That we're always oh so glad to learn

In our happy heads
Going together
With my happy heart babe
Said my happy head
Goin' together with my happy heart

From the tip of my toes to the top of my spine
All over my body and in and out of my mind
You fill me up with thoughts of love
And loving you is all I'm thinking of

In my happy head
So good to have you
In my happy head all the time
Loving you well loving you baby
Said I'm guilty if a crime
Time after time after time

How important can you get?
