Caught in the endless turmoil of the  
invisible, absurd downfall  
My eyes can't see anymore, my feelings are lost,  
Suicide hangs  
The divine process of the sixth day grows in me,  
Resurrection!!

Sublime revival, atonement of my body and soul  
Amnestic Adam, lost and disconcerted  
Where is the way which leads to the Garden of Eden  
Each peace of art is a peace of memory, but we  
have lost so much

Where is our father?  
has He forgotten us?  
I research my "Me"  
Through the limbs of Art!

Why, in my dreams, can I fly and reach the sky?

What are these weights  
which keep me down there  
And make me live a nightmare?

Sons of the earth  
The subtle division between  
Mind and body  
Make us feel so sick

Without conscious we are just meat!!

I, the human being, am in quest of my real nature!  
Science can't give the final answer.  
Philosophy, help me!  
Don't let me die blind!  
Just give me the light  
The light!  
Just give me the light!

I am at the start of my long quest...
