From the depth of the fire  
From beyond the oceans  
They were born to darkness  
In the mountains that speak

Silence is broken  
By wings of steel  
Hear ancient evil  
Echo through the night

Under the dragon's wing

See the dragon's rising  
To a sheltering sky

See the clouds in the distance  
Burst into flames

Eyes in the dark  
Seeking the fear  
Ice of the dawn  
Dragons they are near

Under the dragon's wing

Where angels dare to tread you'll find them  
When destiny has fled behind them
