Give me a kiss hello goodbye what's the difference?
Just end everything
You say with a smile, wave goodbye, hello, with that
look in your eye
Forwards backwards back it down the drive, the
curtains in the window
Wave goodbye hello there's that look in your eye and
your crazy smile

I know you and you know me too. I know everything that
you're going through and
You know everything that I'm gonna do. You know me
and I know you

Give me an invitation and I'll be there unless of course I
have to be somewhere
Give me your wishlist, let's shake hands. If you don't
like it you can
Have your money back
