Imagine a voice
To say it will be okay
Fold my hands and pray to God

Nothing changed
So I decided not to believe
I don't believe in God
The last hope was gone

I reach out my hands
Imagine someone there
To guide me to a safer place

Violence
You are not in my life anymore
Violence
You have been there
From childhood til now

Feeling so small
Towards the world in front of me
Feel I'm nobody at all
While everything is changing around me

I just want to hide
Feel strangled inside, just want to hide
If guardian angels really exist
Then where are they

I reach out my hands
Imagine someone there
To guide me to a safer place

Violence
You are not in my life anymore
Violence
You have been there
From childhood til now
