Album : Survival sickness (2001)

you can choke on easyways while we stay up every
night and every day
doesn't matter what you say cause your ways are all so
fucking lame
yeah, and we're all coming over while, watch you take
your pills and we watch you fall asleep
yeah, and were all going to dig the sound of the new
beat
there's no way that you're going to make it out of here
in time
only lovers, only lovers are going to be left alive
feel that heat that we are all talking about, a realization
of our wildest schemes
your lack of passion and your lack of dreams pretty
much made you obsolete
no more sitting down, shutting up, taking shit, we could
never dream of it
yeah, and we all going to scream about it
yeah, and the kids are finally going to reign
yeah, get rid of all the adults cause they couldn't take
the strain
there's no way that you're going to make it out of here
in time
only lovers, only lovers are going to be left alive
you can choke on easyways while we stay up every
night and every day
doesn't matter what you say cause today your
traditions are completely dead
yeah, and were coming over, yeah, the old ways are
going down
yeah, were all dying of laughter, yeah, while we dig the
new sound
