As the signs grow stronger  
Our fate clearer  
Take no precautions  
Follow your leader

As our love grows deeper  
We fill each other  
Still admire the darkness  
Let it become larger

Fall...demise...all  
We're...disguised...gone

Weep together the rain to come  
Feel at heart, the pain is gone  
Weep together the rain to come  
Feel at heart, the pain is gone

As life drifts further  
Our beauty is the core  
Always sighing after  
Still I crave more  
Hope alone grows higher  
It struggles to be free  
You and me on fire  
All that we can be

Fall...demise...all  
We're...disguised...gone

Weep together the rain to come  
Feel at heart, the pain is gone  
Weep together the rain to come  
Feel at heart, the pain is gone

Weep together the rain to come  
Feel at heart, the pain is gone  
Weep together the rain to come  
Feel at heart, the pain is gone
