Chorus.

Go your way, don't listen to the others
They've doubted for the last time
They can't break you, even if no other
You go your own way

If you believe like I believed
Then you will go all the way
If you believe
Then you will go all the way...

Verse 1:

Listen love/dear, I know you're far from home
I know that chasing dreams is tough when you walk
alone
While being singled out, catch every single doubt
That they send your way, it's like they came here just to
bring you down

I know you're feel/feeling alone, but trust me, I know
Just what you're going through, standing there trying to
find hope
Weight of the world on your shoulders, walking a
tightrope
Ten thousand feet up in the air trying to find hope

'Cause when the dust settles and the smoke clears
And you're feeling ready, get rid of those fears
Rise above all their comments and cold stares
And give the finger to the world like you don't care...

Chorus.

Verse 2:

I used to live in fear, but now I walk the streets
Like I'm the king of the world, man, no apologies
So you can all just keep talking, it won't bother me
('cause)
Being around the weaker you just made a stronger me

Understand that I ain't saying that I'm flawless

I'm just saying nowadays I worry 'bout my flaws less
Out of the darkness, aiming for that new high
Wings spread wide as I be flying 'cross that blue sky

'Cause when the dust settled and the smoke cleared
I was ready man, got rid of those fears
Rose above all their comments and cold stares
And gave the finger to the world like I don't care...

Chorus.

Come a long way since that skinny dude
Was told by his teachers he wouldn't make it to 22
But I'm still standing, feeling incredible
As I lift my daughter to the sky - I guess I'm living
proof...

Chorus.
