Intro (JaeWon):

Uh... Yeah...

Ladies and gentlemen - you know who it is.

Coming live to ya, straight outta Zeroville.

JaeWon.

Chorus (Peter Krafft):

So just believe that we can be

Something that is SO MUCH BETTER

We're so much be-be-better

So just believe that we can be

Something that is SO MUCH BETTER

S-so much better...

Verse 1: (JaeWon)

I used to have dreams of flying cars and lightsabers

OD'ing on neon lights and skyscrapers

To me it didn't matter that I was a flyweighter

I just walked by the bleachers fly like "Hi haters!"

Whatup Doc? Fix the clock, then it's on again

Pull up my socks, check the watch, feel the morning
wind

Tie the laces on my Chucks and I'm sure to win

Fast-forward when I hop in my Delorean

A flash of light right over your backyard

While you're pointing fingers thinking "He'll never go
that far"

Now I'm flying high with the greatest of rapstars

Never running out of gas, it runs on trash talk

Shooting for space, won't settle for the stars

Fly far, five star rebel with a cause

I'm hoverboarding through the madness

Just an 80's baby bumping classics...

Chorus. (Peter Krafft)

Verse 2: (JaeWon)

Now when you hear the theme song as the movie starts
And you see this kid fly over the moon and Mars
It's just a little story that we used to call
The chronicles of a schoolyard superstar

I can't lie man, the music taught
Me nearly everything I know, lead me through the dark
All those times when I was about to lose the spark
Recalling memories of when I used to rock

To this tape that I put in my boombox
That made a little dude hop over the rooftops
To revel in the music, feeling the boost, hot adrenaline
Like you got hit with a few shots of venom when

Knowing that there ain't no antidote
And it's hard to keep your head up when you stand
alone
But I'm a dreamer, refuse to abandon hope
So I'm rock, rock on till my casket's closed...

Chorus x2. (Peter Krafft)
