(Verse 1)

I'mma stick around and let u do what u do
U can play around with my heart if u want to
Ever had a problem with u coming home late
I know u think u'll always rather start up a debate
I try to stick around and try to love u harder
Try to pull u closer but u push me farther
Its only so much that I can take (take)
And I know u thought that I would wait

(Chorus)

If that's what u thought..
I know..
Why we're no good
There's a few things we gotta get understood baybay
If that's what u thought..
I know..
Why I gotta go
There's no point in staying
So I'd rather be alone uh huh

Just for the record baybe
Just for the record baybe
I let u get away with it
Watch me walk away from this
Just for the record baybe
Just for the record baybe
U lost something that was too good
I can't stay even though u thought I would

(Verse 2)

I know u though..
U ain't gotta call me when I leave a message
Prolly didn't get it cause u got no service
I already know what u bout to tell me
But its so many time, its like u got it on repeat
But let me make it easy on u cause I know its hard

U ain't gotta lie to me no more

Its only so much that I can take (take)
And I know u thought that I would wait

(Chorus.)

If that's what u thought..
I know..
Why we're no good
There's a few things we gotta get understood baybay
If that's what u thought..
I know..
Why I gotta go
There's no point in staying
So I'd rather be alone uh hun

Just for the record baybe
Just for the record baybe
I let u get away with it
Watch me walk away from this
Just for the record baybe
Just for the record baybe
U lost something that was too good
I can't stay even though u thought I would..
I know u thought..

(Bridge)

Don't worrrryyy..about me boy
I'll be fine..
Spent enough time without ya
I already know..
U'll always be the saammee..
So why would I wait for

(Chorus.)

If that's what u thought..
I know..
Why we're no good
There's a few things we gotta get understood baybay
If that's what u thought..
I know..
Why I gotta go
There's no point in staying
So I'd rather be
