

Jape "Floating"

Visit "[Floating](#)" on MotoLyrics.com

We took our first pill when
The music was shit
I said "fuck dancing all night"
But then thats just what we did
It felt like floooating
It felt like floating

Your body was warm when
I laid by your side
I said i'm glad i have found you
And i'm glad we're alive
It feels like floooating
It seems like floooating
It seems like floating

We laid by the river
We looked at the stars
I said "how tiny we are girl
How tiny we are!"
It feels like floooating
It feels like floooating
It feels like floating

A lifetime is short girl
And death is so long
I don't belive in no heaven
I just hope that i'm wrong
I hope we're floooating
I hope we're floating

Cause watching the world girl
I don't understand
It just makes much more sense with
My hand in your hand
It feels like floooating
It feels like floooating
It feels like floooating
It feels like floooating
It feels like floooating
It feels like floating
