She only complains there's too much sun
Usually when all my drugs are gone
Some might say they would throw her away
Oh but I hold her close

So much more than before
She's my new best friend
She's my porno queen
She's my brand new leaf

Brought home something new
For me and you to abuse
To centre ourselves around
To blow our minds apart again

Somedays are just right
Somedays I just fight
Yesterday's looming like a shadow
Only cause she shines so bright
