There is only one way to go ahead on the brink of the  
precipice  
It's just step back look around never cry about  
something you miss  
When you are not waiting it comes as the last one  
showdown  
Doesn't matter if you are fast enough running away  
to downtown

We can not open your eyes  
You have to do by yourself  
Hurry up with the dices  
Listen to nobody else

No one has told you about our life could be this pain  
Then now you take a lot doubts inside your head again  
As if it was possible to solve all the problems at same  
time  
Everyone is blaming you for what is happening to your  
life

We can not open your eyes  
You have to do by yourself  
Hurry up with the dices  
Listen to nobody else

So they cannot imagine and even understand  
That you face those things like in a dangerous game  
In the end we will show them the scars on ourselves  
skins  
There's no way they feel sorry or just know what it  
means

We can not open your eyes  
You have to do by yourself  
Hurry up with the dices  
Listen to nobody else
