I know you I can tell
You hide your sadness very well
After all they put you through
Don't be sad now don't be blue
We'll find the time to make you understand
Don't go weird on me, babe

This darkness has come before
Don't let it break you anymore
Its only come to show that
You and I know where its at
The rest who think they've got it pat know nothing
Don't go weird on me, babe

I know you I can tell
Disappointed you may be
After all they done to you
Don't be sad now don't be blue
We'll find the time to make you understand
And don't go weird on me, babe
Don't turn weird on me, babe
