Lady, she came out of the dark
Caused my heart to flutter
She kills me with the way she smiles
Lady, I know that you're lonely
There's nowhere to hide
Dry these smiles that melt in your eyes

She's seen some ups and down
The wind blowing round
She stays silent and alone in the world

Why don't you look my way
And she hides behind her face
And I'm down on my knees
Fall down on your knees

She snowflakes in the light of the sun
In all things and all places
Lady spent, the whole night drinking
Apple and the almond trees will blossom

Why don't you look my way she hides behind her fate
And I'm down on my knees fall down on your knees
She snowflakes in the light of the sun
In all things and all places
Lady spent, the whole night drinking
Apple and the almond trees will blossom

How beautiful,
She would be in one of those gorgeous costumes
In the soft evening air I shall like to cherish her Dear
life, in her red dusky glow
Lady she came out of the dark
Caused my heart to flutter
She kills me with the way she smiles
