Shrouded by your enchanted veil  
Full of lust, full of sympathy  
Where the souls of dead are  
Giving forth their first screams  
And dawning upon naked crags  
Silhouette that arouse my desire  
And capturing my ravished sight  
Oh, my majestic princess of the dark  
Blind sight within the dead walls  
Of obscured dream of passion  
Attack of moonlight beared by wind  
Dazzling luna eclipsing our horizons  
In silent night she arise again  
Bringing delights and eternal agony  
Erotic impulse thy beast unleashed  
Immortal touch dissapeared in blood  
Thy darkened wishes behind the tear masked  
Purity lost somewhere within the night  
Cold eternity called her name  
From deep ebony whisper  
Soul gently embraced by wind  
A divinity falls to infinite slumber
