Love will come, and love will go  
Where it's gone, I can't follow  
How we roam the empty streets of all dead ends  
We can't be lovers and we can't be friends

Love worth losing all will always leave you sold  
What you pay for is the pain of getting old  
How we lose our way in dreams when we depend  
On the strength of lovers and the hearts we tend

Now I see, love only  
Comes when you're dreaming

I've already heard what you said  
It makes no difference now that love, love is dead  
I may agree sometimes but mostly I'm just shaking my  
head  
It makes no difference now that love, love is dead

Our kids will hate what we've become  
Let's fall in Love, it sounds so fun

Now I see love only  
Comes when you're dreaming

I've already heard what you said  
It makes no difference now that love, love is dead  
I may agree sometimes but mostly I'm just shaking my  
head  
It makes no difference now that love, love is dead
