To the deep end
To the heartline,
Hold it straight together man
Hold it straight together if you can
Little fever wrapped in medication
All strung out on novelty collapse yourself try to
comprehend
An angry island, a bitter beestings
Severing each artery to free the self and fix the
inbetween
Isolation mark the earth around you
Guess whose on the waiting list
I'll let you in on something secret

I can disappear
Any time I want to, time I feel you
Shuffle through my skin
I am with you till the end

First you breathe out
Than you have to breathe in
Lash yourself repeatedly until it sticks, until it sticks
Under the eyelids carry on cadavers
Festering interiors hollow reach and vapor silhouettes
Need medication, more medication
Coursing through your innerstate
A matergrate confused and counterfeit
Kamakazi to sear this blood inside you
Guess whose got it figured out
I'll let you in on someting secret

I can disappear
Any time I want to, any time I feel you
Shuffle through my skin
I am with you till the end
And I can decompose
When it suits me I accelerate it
Wicked on all fours
I surrender to the scorm

You'll never know how it feels

You'll never know how it feels
Can you feel it?
Can you feel it?

I can disappear,
Any time I want to, time I feel you
Shuffle through my skin
I am with you till the end
I can decompose
When it suits me I accelerate it
Wicked on all fours
I surrender to the score

And I can disappear
Any time I want to, any time I feel you
Shuffle through my skin
I'm with you till the end
I am with you till the end.
