sunshine, goodbye
she was lovely give her back
so damn lovely i want her back
woke up this morning
kicked in the door
door to the world
war on the world
it's time to make them see
time to make them plead
i'm gonna claw the open sore until it starts to bleed
she was lovely give her back
so damn lovely i want her the way she used to be
wait for the evening
she never comes
beautiful girl
raped like a whore
couldn't make them see
giving her a disease

infected womb will perish, there's a sickness in the
seed
war on the world
this means war
[guitar solo]
sunshine, goodbye, war
she was lovely give her back
so damn lovely i want her for that last time
woke up this morning
looked for the world
but she was gone
torn from her hole
couldn't make them see
poison veins don't feed
violated earth aborted drowned in the disease
yes, you will believe
lord, don't you think they saw it coming!
