oh oh oh oh
oh oh oh oh

The holy voice at Har-Sinai
Revealed to us the laws of life
and through the darkness came his light
to guide and guard us on

And though we seem to stand apart
every one of us beat with a single heart
together we remember
we are one

The Beis Hamikdosh in glory then
the heartbeat of Jerusalem
we pray to see it rise again the home of David song

We know the day will surely come
the return of our king to Jerusalem
eternally together
we are one

Yes together locked in harmony
to walk along the path of unity
as the shining stars will always be
together

And together we will always stay
for even if from far apart we pray
and so many sparks become one flame
together

We're together in our hopes each day
together in the pray he hears us say
than our many words become one page
together

And forever we are brothers, sisters and friends
the children of Hashem until the very end
as the colors of the rainbow blend
together

oh oho oh waw ohoh
waw ohoho

Together as our fathers told
we trust whatever the future hold
we gather in our land of gold
the heavens with behold
no longer to be far apart
every one of us beat with a single heart
together with Mashiach
will be one

Yes together locked in harmony
to walk along the path of unity
as the shining stars will always be
together
and together we will always stay
for even if from far apart we pray
as so many sparks become one flame
together

Yes together in our hopes each day
together in the pray he hears us say
than our many words become one page
together

And together we are brothers, sisters and friends
the children of Hashem until the very end
as the colors of the rainbow blend
together

So many sparks become one flame together

So many sparks become one flame together
