Turn the key
Everything's meant to be
I've never seen
beauty like you

Graciously saving your heart for me
A smile shining
Across the room

I will love you like the sunshine fills the world
I will love you when I'm not here anymore

I will love you
I will love you
I will love you after the last wave kisses the shore

Tomorrow's clear
Starting forever here
Spending each day by your side

Destiny, creating a life with me
Marry me
Be my bride

Cause I will love you like the sunshine fills the world
I will love you when I'm not here anymore

I will love you
I will love you
I will love you after the last wave kisses the shore
I will love you after the last wave kisses the shore

I will love you like the sunshine fills the world
I will love you when I'm not here anymore

I will love you
I will love you
I will love you after the last wave kisses the shore
I will love you after the last wave kisses the shore
I will love you after the last wave kisses the shore
