Hey baby, I love you, no matter what, can you hear me, let's go...

Baby we are more than two
our love is like a flame
Everything I'll do for you
if you're feeling just the same
When our child was born
God was on our side
and I swear to you
our love survive
all I want is your heart
you're the world just for me
everytime, everywhere you are more than a dream

Refain:

I love you ever
forever
more than words can say
let's stay together
and never
I will go away
I can't live without the sweet emotion
I can't live without the deep devotion
there's one thing I'm sure of
You're everything to me

Baby words can not express
all the love I feel for you
Baby and I just confess
that you make my dreams come true
oh I'm halfway to my paradise
baby if I see you're smiling nice
In the age of the storm
I was deep by your side

heaven must have sent you
you are my guidingline

Refain:

I love you ever
forever
more than words can say
let's stay together
and never
I will go away
I can't live without the sweet emotion
I can't live without the deep devotion
there's one thing I'm sure of
You're everything to me

Baby I love you... ever...forever

I love you ever
forever
more than words can say
let's stay together
and never
I will go away

I love you ever
forever
more than words can say
let's stay together
and never
I will go away
