Energized by light, despise my fright  
Holdin' me down with all your might  
Knights ignite, and draw your swords  
Struggle and force, Be with you  
The jedi needs a tissue  
Us crew, Mutha fuckas I miss you  
Brains confused like a bum on booze, snooze you loose  
Incoherent to my brain state, damn I'm baked  
Logics progressed by the stakes, on an average basis  
Realize your life, and through your last kiss

Realize your lies  
Contemplate your life  
Unsuccessful tries  
Obsessed with death  
Take your last breath

America one nation under a god indivisible  
Comprehensible logics, Hooked on phonics  
Books on chronics  
As my conscience grows  
Into a new realm, where everyone's soul begins to glow  
Minds explode and carrode into portholes of endless  
roads  
Who is the chef, he is unknown  
Dreamin' of death, conflict of interest I must confess  
The evil plots, and tests realize your last breath

Realize your lies  
Contemplate your life  
Unsuccessful tries  
Obsessed with death take you last breath  
I love you  
I hate you  
I feel this pain inside of me  
I hate you  
I love you  
I feel your pain inside of me

Believe the truth, I snoop upon Allies  
Why lie, I discover spies  
my eyes are dreamin' while my brain is seein'

complicated beings  
With devilish screams of taken over my thoughts  
convincing me that I bought  
Things that I forgot, Are they against me on this evil  
plot  
I feel the shame  
No energy remains, to reconstruct my pain withhold the  
truth  
Convince these lies  
Realize your life and take your last breath

Realize your lies  
Contemplate your life  
Unsuccessful tries  
Obsessed with death take your last breath  
I love you  
I hate you  
I feel this pain inside of me  
I hate you  
I hate you  
I'll pray for thee in time of need  
I love you  
I hate you  
I feel this pain inside of me  
I hate you  
I hate you  
I'll pray for thee in time of need
