I live in a dark vision
Of the cold night,
I'm feeling the flame
Of my black soul.
A Fullmoon excites me
When the night begins.
I rise through my flesh
To own pain and sorrow.
I walk alone into edgeless space,
I see everything by inner glance,
I wanna wish millions legions
Black god have abundance
Greate Ambassador came alone
From black ether of edgeless emptiness.
He's giving me grants from father of elects,
From grand and mighty Lord of Darkness
I go farther into the Pagan Land
Created by true gods from eternal chaos.

I was feeling the power of the might influence,
I was hearing the call of the Ancient Gods.
My Mystic Mind And My Dreams
Are better place for mystery travel
It's the way without end and edge
Where I was reborn by root of evil
I walk alone into endless space
I see everything by inner glance
I want to remain there in space
With millions legions of black god
No more flash from lightning.
I see everything.
Light is darkness and darkness is light
Real Universe not feel
