The sacred might conceals
Under a shell of our consciousness.
The latent forces of person and space
Give great power over boundless...;
Open space of the world and nature
Open space of reason and mind.
Penetrate in secrets
Of consciousness and being,
Of matter and spirits
Through black sorcery.
Dreary silence and grey quiet
Strengthen influence of Occult Philosophy.
Learning of Occult Philosophy.
Triumph,

But keep it in dark sanctuary
Of the own heart in the silence.
Otherwise it loses the mighty power.
The human will can lead
In distant space of a free state,
Give cognition of power
In burst of astral energy of your soul.
.Dreary silence and grey quiet
Strengthen influence of Occult Philosophy.
The human will should manage
Powers of all elements
In the astral stream
Of Kosmic Light and ether.
