Fading down alone in despair
Frost & moon are like bullets in my head
Never will forever stay the never
And my black depressionÂ'll never end

Faceless world and mask of the unknown
Fear of to live & of to die
Never will forever stay the never
And my black depressionÂ'll never end

Movements full with pain
Thoughts of darkest sence
Alien in bloody reign
AinÂ't able to defense

Minds where to live is it to die
Where all morning are like death

Roads to heaven are to hell
Nothing could change it fucking well

Â"Forgive me father Â- for IÂ've sinnedÂ"
Nothing but silence & sound of wind

ThereÂ's no salvation in belief
DonÂ't try to find it in books
So many words for simple things
Justice & hatred & love

Crowds of indeferented faces
CitiesÂ're like beats with opened jaws
Never will forever stay the never
So my black depression will never die.
