

Morbid Victory

"Children Of The Wolf"

Visit "[Children Of The Wolf](#)" on MotoLyrics.com

Frozen morning in forgotten land
Time is coming passing like a sand
People kill the wolves for just the fun
But today we don't want to run

Live forever between life & death
Our hatred's growing like abscess
We're the children of the wolf with our faith
And we'll fight for it till our fucking death

No one follows & none gives a fuck
For our tribe on our way to dark
We're children of the wolf with our pride
And we'll fight for it till everyone will die

Only the hate helps us survive now
Maybe none will stay alive today
Nearer faces of our foes

Someone will live someone will die of cause

Death's everywhere blazing & shooting on us
But our tusk will find some throats at last
We're not lambs - We're the wolves your know
And so the people better so shoot crows

Die for freedom die by human hands
Death of freedom - evolution's end
People kill the wolves to stay alive
But as soon we're dead they also have to die

We see faces in the morning mist
Full with fear of to kill & live
We don't care their rifles blaze
We remember that the Freedom has the bloody taste.
