Do every stupid thing that makes you feel alive
Do every stupid thing to drive to drive the dark away
Let people call you crazy for the choices that you make
Find limits past the limits
Jump in front of trains all day

And stay alive
Just stay alive

Play with matches if you think you need to play with
matches
Seek out the hidden places where the fire burns hot
and bright
Find where the heat's unbearable and stay there if you
have to
Don't hurt anybody on your way up to the light

And stay alive
Just stay alive

People might laugh at your tattoos
When they do, get new ones in completely garish hues
I hide down in my corner because I like my corner
I am happy where the vermin play
Make up magic spells, we wear them like protective
shells
Landmines on the battlefield
Find the one safe way

And stay alive
Just stay alive
JUST STAY ALIVE
