light of the candle, bright one's soul shined  
woke up new morning feeling better than ever, fine  
chest no hurt no more, something feel better  
what's all the hate for, now something feel better  
to zion goes i, to zion goes i, to zion goes i, to zion  
goes i

walk through the valley and i'll follow the stars  
i feel it so close now, it can't be that far  
time some grow lonely, but time isn't done  
it's time to go home now, you're not on the run

to zion goes i, to zion goes i, to zion goes i, to zion  
goes i  
to zion goes i, to zion goes i, to zion goes i, to zion  
goes i

one step forward and i crossed the line again  
one step forward and i crossed the line again  
standing on the edge of a civilization  
no one's around  
standing on the edge of a civilization  
and no one's around and i ain't heard a sound, yeah

the path is snowed over, the path lies ahead  
soon we'll be down there, and nothing is said  
there's no need to fear love, don't let love hide  
conquer the mountains way down by the riverside

to zion goes i, to zion goes i, to zion goes i, to zion  
goes i  
to zion goes i, to zion goes i, to zion goes i, to zion  
goes i
