Verse I:

Translucent cuts and mislead dreams,  
Keeping the darkness to the obscene.  
Clouding the memory of you,  
With the only love that shows through.

Chorus:

We've got...  
One chance to find the answer.  
One chance to save us from our, life.  
One last chance to be this and make it right.  
One chance to complete our lost soul,  
One chance to be this fucking sight,  
One last chance to make you mine.

Verse II:

See this sight,  
the blackest night.  
The bite marks never felt so good.  
We'll win the fight,  
Now make it right.  
I never loved you like I should.

[Chorus]

[Guitar Solo]

[Bridge]

Now that we're lost,  
Now that we've crossed.  
Now that I won't be alone again.  
x2

[chorus]
