The stars that shine tonight
Remind me of you
I remember when we met
How can I forget
You left me all alone
With just regret
So I still love you so
And I just wanna say girl
Hope our love grows
We met beneath the stars on a balcony
I looked in to your eyes
And then you came to me
So I still love you so
And I wanna say girl
Hope our love grows
We met beneath the stars on a balcony
I looked in to your eyes
And then you came to me
Whoa and then you came to me
