I started sending you a message
The night when I listen to Copeland songs
I want to share this moment with you
The next day i play your music on my player

These make me feel image of you

But after we had stroll from a.m to p.m
I remembered it's clearly
When you neared me
And I just wanted you to feel safe and secured

Now I sit on the train
Beneath my seats was my friends guitar and bass
I set my sight at the window
As I listen to " So long Astoria " (The Ataris)
And every Rhytm in it reminds me to all memories
