Life is sickness but you have to survive  
Peace is impossible in eternal war  
We are living in death  
Fucking god made us so, no peace

The mad savage mind of the human race  
Creates the hell here  
Unjustice around, corruption rules  
The beginning of selfdestruction where we are

Impossible to endure such a life  
Where money decides all  
And man to man is wolf  
And when to kill is never enough  
I want to love but have to hate  
The different bastards of the world  
I hate this human race  
I cannort exist here anymore

My life is womb  
Birth will come after  
Without pain with nothing  
When my fleshless soul will fly  
In the deepening silence of the sky

I want to rest  
I want to rest in peace  
Without any feelings

Without
