"One Of Us"

Visit "[One Of Us](#)" on MotoLyrics.com

Too late, I spoke too soon...on the dark side of your
moon
Floating 'round you like an astronaut
Seems like you can't convey...the words I wanna hear
you say
And now I'm floating like an astronaut...an astronaut
How'm I gonna get to where you are...when you seem
so far away
One of us has to say goodbye
One of us has to know
That one of us has to be the one of us...to let it go
Your world has turned around....I'm obiting you upside
down
Floating 'round you like a satellite
Once you, were close to me...but now it seems eternally
I float around you like a satellite....like a satellite
How'm I gonna get to where you are...when you seem
so far away
One of us has to say goodbye
One of us has to know
That one of us has to be the one of us...to let it go
I've been wishin' on a star...I'm flyin' in my car
But you're nowhere
(nice guitar solo)
Too late, I spoke too soon...on the dark side of your
moon
One of us has to say goodbye
One of us has to know
That one of us has to be the one of us...to let it go!
One of us has to say goodbye
One of us has to know
That one of us has to still
One of us...one of us to let it go!
One of us!
One of us!
