mescaline in the sun  
you try so hard to find someone  
I used to be a hero, with blood on my saddle  
fighting every battle, I used to be alone

You shoot up, and you go to class  
it's funny how nobody asks  
Cause all your teachers love you, everybody loves you  
Everybody loves you , the same way that I do  
what a wonderful world, that we live in

You're a love disaster, your heart beats faster  
when it's with mine  
You're a likely story, morning glory on the vine

There are holy ghost, pushing past the tide  
They let me know, every time you cry  
Cause you're burning in some backseat, burning in  
some room  
Burning is the one thing, that you should know how to  
do

But I can't but out a fire, when it looks like you  
You didn't do the same, when I asked you to  
What a wonderful world, that we live in

You're a love disaster, your heart beats faster  
when it's with mine  
You're a likely story, morning glory on the vine. x 3
