I Stand Alone

Verse 1

Play play that part to the so called right track  
Right track cause ya'll going way back  
Past is fast when times goes by  
Soak in the Great Way but not the evil eye  
I mean it son so now feel the realness  
Dead to my flesh cause I had to kill it  
Running like a rampage thru my soul  
Vicious virus I risked to break the mold  
Go against all odds make it work  
You should know what I spit we're the salt of the earth  
Rhyme after rhyme time after time  
Time fading invading the way that I speak in my rhyme  
SS convertible sweet, but still meaningless  
Mansion in the hills I have, parable meaning this  
Listen close and you might learn something  
I stand alone because I stopped my running

Chorus

Don't let em break your will  
I can't cope with the lives that failed  
I stand all alone by myself, by myself

Verse 2

Keep strong in the battle I keep my vest on  
Keep chest strong your jealous then get gone  
Put your armor on protect yourself  
Add to your safe set and invest your wealth  
When push comes to shove I be standing my ground  
Ya getting sleepy on me soulja don't be laying around  
I buckle up for a tight situation  
I'm pushing weight for a tough generation  
My feet fitted with my Lugz the boots  
Hand in hand with the Timberlands praising thru  
Eloheem to the fullest extent and yes perfect  
A shield of protection because it's worth it  
Block the negative talk of some media  
Some guys and girls hate for no reasoning  
Head gears on the mic in my hand  
My lyrics slice like a sword so alone I stand

Chorus

Don't let em break your will  
I can't cope with the lives that failed  
I stand all alone by myself, by myself

Verse 3

I can do any everything put me up to the task  
I ain't afraid to be seen I won't be wearing a mask  
Look in eyes and see determination  
Scriptures taught me the patiently waiting  
Read the Good Book study like a cook book  
Good luck cause young bucks get real shook  
Advice from me it's right and free  
Turn around right now before ya cop a plea  
Ya hostile b, so what's going down  
He never see no colors yellow white black brown  
Ya scoop the loot tell me what's your excuse  
Life is precious so lose the noose  
Be a man, boy girl be a woman  
Your better than for settling a bad demand  
Hear me out thru my words of stealth  
Take a stand right now I stand by myself

Chorus

Don't let em break your will  
I can't cope with the lives that failed  
I stand all alone by myself, by myself
