I found the perfect thirty acres south of Lycan
It sure feels good to feel good for a while
The soil is dark and the water is good for drinking
Miles and miles of corn fields kiss the sky

This place is a world away from Denver
But when the snow falls in December
I can't help but wonder

[Chorus]

How far is far enough away from Colorado?
How long is long enough to lose your memory?
How much does one man have to hurt to go on and let
it go?
How far is far enough away from Colorado?

Sometimes I feel like I've been here forever
This small town folks sure make you feel at home
I've been seeing Karen since last summer
So tell me why do I still feel alone?

Around here there's no hills but there's a mountain
I have to climb or go around it
If there's a way, I haven't founded it

[Chorus]

How far is far enough away from Colorado?
How long is long enough to lose your memory?
How much does one man have to hurt to go on and let
it go?
How far is far enough away from Colorado?

How far is far enough away from Colorado?
How long is long enough to lose your memory?
How much does one man have to hurt to go on and let
it go?
How far is far enough away from Colorado?
How far is far enough away,
