When a girl walks next to me
it feels like she's the only one i see
and i feels much better
than how i usually feel'shh'
everyday(between you and me)

'Cause that girl loves me
and i can see
the brightness in her eyes
and i do realise
that me and her have one connection
we both like who we see

You know that girl who walked next to me
well i know she loves me
'cause yesterday she asked me if i loved her
and that she loves me

'Cause that girl loves me
and i can see
the brightness in her eyes
and i do realise
that me and her have one connection
we both like who we see

Now me and my girl will always be
close to eachother as two little peas
in one pod and cream and apple pie
so i know that we love eachother
'Cause that girl loves me
and i can see
the brightness in her eyes
and i do realise
that me and her have one connection
we both like who we see
