I saw them took my body, separate my soul and take
apart it,
Analyze my train of thoughts compare it with the
system of elementary.
They divide my flesh and gather back it and I do not
know how they can make it.
The conclusion is investigated: Man is primitive so they
can create it.

The conception of creating human. Cloned race of
slaves. They need of few men
To possess some kinds of labor forces. Add more
hands, make stronger than some horses.
Short intelligence, all human needs and adjust the
system of minimal feed.
Simplify all homes to common cages. A female must
birth a dozen babies.

Why must our names be erased?

Blast fill my eyes!
Sudden rage!
Silent skies!
