I have lost all passions,
I feel like in misery,
I will touch my name
And fall... into purity.
I know all of master.
I was one of followers.
Obey the disaster
Now... be of my proud!

I'm burning!
I'm burning black!
Come with me,
We'll never back!

I'll break all illusions,
I know rules of universe,
I pray only one
And blow... into rebirth.
I go way of silence,
I fly to the emptiness.
Erase. All the time is
Lost...

The day we've never forget
When we rushed to the top
Through the time and eternity...

The day we've never forget
When we fell through the grave
And became the infinity...
