One night in heaven, one night in heaven
One night in heaven, one night in heaven
One night in heaven, one night in heaven
One night in heaven, one night in heaven

Sometimes I get to thinking while you are far away
Just how much I miss you and how time it ticks away
So sad when we are fighting, too much tension too much hate
Sometimes I need reminding before it gets too late

Just one moment in my day, yeah
Take me up to a place
So far away in your heavenly space

One night, mm, one night in heaven when you touch me
You take me up high with the clouds in the sky
One night, whoa, one night in heaven when you kiss me
You light up my life, make me feel so alive

While people create problems, lie and cheat in vain
Come lay with me in my bed and wash away the pain
Take me on a journey, let the pleasure start
Take me on a journey that leads straight to your heart

Just one look I can see in your face, yeah
You're my love satellite
In orbit with you such a beautiful place

One night, mm, one night in heaven when you touch me
You take me up high with the clouds in the sky
One night, whoa, one night in heaven when you kiss me
You light up my life, make me feel so alive

Just give me one night, just give me one night
Just give me one night, just give me one night
Oh, I'm in heaven baby, oh I'm in heaven baby

One night, mm, one night in heaven when you touch me

You take me up high with the clouds in the sky
One night, whoa, one night in heaven when you kiss me
You light up my life, make me feel so alive

One night, yes one night
One night, one night, one night yeah
One night
One night, one night, one night yeah
One night, whoa, one night in heaven when you kiss me
You light up my life, make me feel so alive
