I miss-missing you
I miss-missing you

Where's the pain when you walk out the door
It doesn't hurt like it used to before
Where's the love that we couldn't ignore
It doesn't kick like a pill anymore
Where's the thrill at the end of our fights
Where's the heat when we turn off the lights
I just miss all the miss that we made
When we still have the passion to hate

Chorus
I miss missing you, sometimes
I miss hurting you til you cry
I miss watching you as you try
Try not to end up in tears
Begging to get back together
I just want you to be
To be stuck in a second forever
So don't freak out and believe

Sometimes I'm just missing, missing You
I miss-missing you

There's a dark cloud pulling me in
That's the girl I was breathing in sin
There's a blind force letting it win
And it's longing to tear us apart

I get high when you're making me weak
Let me down 'til I crawl on my knee's
I just miss all the mess that we made
When we still have the passion to hate
Chorus

I miss missing you sometimes
I miss hurting you 'til you cry
I miss watching you as you try
Try not to end up in tear's
Begging to get back together
I just want you to be
To be stuck in this second forever

So don't freak out if I leave

Sometimes Iâ'm just missing, missing you
I miss-missing you

(Miss missing, miss missing, miss missing)
I wanna crush in your arms at the other side of the
world
(Miss missing, miss missing, miss missing)
I wanna die for you â'cause love is only true if it hurts

Chorus
I miss missing you sometimes
I miss hurting you â'til you cry
I miss watching you as you try
Try not to end up in tearâ's
Begging to get back together
I just want you to be
To be stuck in this second forever
So donâ't freak out if I leave

Sometimes Im just missing (Iâ'm missing)
Missing you (no, missing you)
I miss missing you
