As I watch the day
I am so amazed by what you do
When I close my eyes
I am mesmerized by thoughts of you
Sometimes I can disappear
I let your love surround me
Little things that I hold dear
Are flowing down around me

Chorus:
Even now I know
This orbit that I'm in
It's spinning me to you
I am silenced by the will of my intent
To only be with you
Completely lost in you

Every dream I hide
Give them wings so they can fly to you
As I wait to find
All I have in mind for me to be
My renditions fade away
I offer no resistance
Take me up into your space
Into your existence
Ooh...

[Repeat Chorus]

It is clear to me
I'm nowhere to be without you
It's true
You're my gravity
And I can never doubt you
I'm lost in you

[Repeat Chorus]
