No longer will I take this shame  
No longer will I close my eyes  
I tolerated you long enough  
Horde of blind and foolish worms  
Decadence and ruin are your highest values  
May hate and revenge become mine!  
The ultimate blasphemy you have become  
I no longer accept your existence

Fear my vengeance little sheep  
I will wipe you from this earth  
My anger lies so deep  
A fatal error was your birth!

The defilement of my creation  
Is all you have ever achieved  
But don't forget who gave you life  
And offered you sweet paradise  
For I am the beginning - And I will be the end!  
Plague to you all - my little fellows  
I already have waited to long

You shall fear my vengeance!

Revenge!

To fucking blind to see  
Not able to think for your own  
Your prayers only increase my rage  
I won't listen to them anymore  
You don't deserve life  
Useless and vain creation  
An experiment that failed  
But your disgrace is mine!

Fear my vengeance little sheep  
I shall wipe you from this earth  
My anger lies so deep  
A fatal error was your birth
