I felt the warmest of your breath  
It's hard to tell, is it now or then...  
Our past our life so far apart  
never to question never to ask why...

Chorus

There has never been a lover ever  
to satisfy my warmest desire..  
until you came along from where, I don't know..

When sunlight shines on your face  
my heart race to the other place..  
where we met so long ago...  
Hold my hands promises to never let me go...  
To sickness and in health...

Chorus

There has never been a lover ever  
to satisfy my warmest desire...  
Baby, Baby until you came along and sealed my  
faith...

Father I ask of you to make it last  
just long enough until I can feel  
That lift you once blessed us with once before..  
My true love have looked me in the eyes again  
for this last time...

Chorus repeat two times

The pleasure I feel from this lover that has never  
been..A lover ever, a lover ever to love me like you,  
yes you baby to satisfy my warmest desire until you  
came along and sealed my faith...
