

Stefan Larsson & The Three Man Combo "Optional"

Visit "[Optional](#)" on MotoLyrics.com

We never thought it was optional, the things we signed
up for.

We never thought we could choose, and leave when we
wanted to.

Help us keep the faith down here, we like to think we're
free.

Its the currency we deal with, its the entity we steal.

We have lost connection to the strangers of this town.
We know that we are cursed, we know that we have
failed.

They lied to get us here, but told the truth to make us
stay.

We never thought it was optional, the things we signed
up for.

We never thought we could choose, and leave when we
wanted to.

Help us keep the faith down here, we like to think we're
free.

Its the currency we deal with, its the entity we steal.

They lied to get us here, but told the truth to make us
stay.
