I'm not complaining, im just figuring out
how everything left us behind
ive got my problems, im aware of them
ill take care of them, never you mind
your still replacing pre-recorded things
they used to say in universities
and books on left wing politics and law
about underlying structures
that so far they dont mean anything
still wont support the personal connections
that you draw
institutionalized mysogony
thats all that stands between my baby and me
now science tells us im hard wired to,
im required to do it with you
cause im a man and ur a woman
and thats what those kind of people do
i stole that line from woody allen
isnt it amusing?
i wish i could make you understand
what woody allen meant
if theres no such thing as objective reality
why cant we quit our jobs and just imagine
we dont have to pay the rent?
institutionalized mysogony
thats why theyre charging rent
to my baby and me
michelle, ma belle, ton beau, michel foucault
a foucault depentent is always ready to go
i think were alone
i should have known
shes got chomsky on the phone
institutionlized mysogony
thats all that stands between my baby and me.
