Is it efficient or does it kill with the skill of a cluster bomb? It'll take time but you know it will if I happen to live that long if you would listen to me things wouldn't seem so gloomy now you keep jamming up the gears and I can't see through the smears and everything's exactly as it appears more I love you more I love you more than I did before but now it's either or or neither nor and when I think about you I start turning green and it shakes me up inside cause it used to be the color of your eyes everywhere I go I see your ghost the spirit of '91 you said you loved me more than toast but less than a staplegun is this the wrong direction? that's such a stupid question now when you make a sacrifice you're supposed to get a wish why does this only work in theory not practice? more I love you more I love you more than I did before but now it's not allowed you're not around I see you going out and everything goes black and I start to fall apart it reminds me of the color of your heart I miss you more than mud lost you more than blood knead you more than dough I love you more than toast more I love you more I love you more than I did before but now we're in a war and what's it for? I read your horoscope and everything is clear and it feels a little weird cause it used to be the color of your tears.
