At night I wake up, what a terrible dream  
The planet is void and dry, no water to drink  
No place to hide from the heat  
Ocean is high and not enough space  
For the life of a living being  
I see a dream but how it can be so real

I know my friend  
We all can play together  
Let's save the world  
Under this blazing rainbow  
We start today  
And so create tomorrow  
I send my love and I receive it back

How could this be that we don't see  
The eyes of our planet full of tears  
Not hearing her voice  
Calling out loud for help  
Free her from pain  
Be careful again  
Do our part to protect her heart  
That we can do, just me and you  
Take a step

I know my friend  
We all can play together  
Let's save the world  
Under this blazing rainbow  
We start today  
And so create tomorrow  
I send my love and I receive it back
