[Track #2]

Across a crowded street I watched her there

Another tired angel fate had forgotten

"Give me love, give me hope,
give me some peace on earth,"

she cried out loud

But in her wounded eyes I saw a spark
and it's burning inside me

Reaching out to ease the pain,
she touched my heart

(chorus)

No weight can break this chain of love

No weight can break this chain of love

Across a barren field I watched him weep

Another farm in the heartland held up for ransom

"Let me live, let me give,
God, let this land survive,"

he prayed out loud

Standing up against the wind
to build a fire

(chorus)

No weight can break this chain of love

No weight can break this chain of love

Across the seven seas blows a wind of change

And all our fears will fade

as the spirit of love is rising up around us

(chorus)

No weight can break this chain of love

No weight can break this chain of love
